

TRIBAL BROADBAND BOOTCAMP

**STRENGTHENING SOVEREIGNTY AND SELF-DETERMINATION
BY BUILDING LOCAL BROADBAND SOLUTIONS.**

What is the Tribal Broadband Bootcamp?

The Tribal Broadband Bootcamp (TBB) is a 3-day intensive learning experience focused on building and running Tribal Internet networks. You'll interact with network operators, industry professionals, and broadband experts who walk through what it takes to build a network and run an Internet Service Provider. Whether you have three decades or three days of experience – it doesn't matter. The TBBs explain what the puzzle pieces are and how they fit together.

Who is the Tribal Broadband Bootcamp for?

TBBs are for folks in Indian Country interested in or focused on broadband. We recommend bringing a small team as many have reported this approach is helpful for team building. At previous bootcamps, people who worked on billing, who had no interest in technology, left wanting to climb towers and help on installations. Technicians left with an understanding of how the ISP must work as a business, or how federal policy has shaped connectivity in Indian Country. In a few days, we prepare people to be much more effective in this work.

How can I participate?

If you are interested in attending one of the upcoming Tribal Broadband Bootcamps, please visit TribalBroadbandBootcamp.com. Tribal Broadband Bootcamp 09 Habematolel Pomo of Upper Lake at Running Creek Casino – **and full scholarships to attend** – are made possible with support from the Arcadian Infracom, Michelson 20MM Foundation, Institute for Local Self-Reliance.
